China on India's Neighbourhood, Pakistan # 3

Public, patients losing patience

It is obvious that the government wouldn’t want to risk the spread of the Covid-19 pandemic, and the containment continues. Thousands of people are continuing to die of the disease in India. The government’s efforts to contain the spread of the disease, however, have been met with skepticism by the public, and the patience of patients is running out.

China’s Economic Corridor

China and Pakistan’s economic corridor, also known as the China-Pakistan Economic Corridor (CPEC), is a key project in the Belt and Road Initiative (BRI) of China. It is a multi-billion dollar project that connects the ports of Gwadar in Pakistan and Karachi in Pakistan to the Chinese market. The project is expected to greatly boost the economies of both countries, and has been described as a “game-changer” for Pakistan’s economy.

Risk multiplies for survival of NE indigenes

F rom the bellicosity of insurgency-related activities in the region to the present-day antipathy towards security forces and outlawed organisations, the indigenous community of northeast India has been facing a perilous situation. The threat to culture, identity and livelihood of the indigenous population was further amplified with the advent of the novel coronavirus in the region.

To all those who still suspect that outcries of region’s natives are an embattled cry for preserving and promoting indigenous peoples’ rights, and not the push for extinguishing the threat to culture, identity and livelihood of the indigenous population, this is perhaps the toughest test for the survival of the indigenous population of Manipur.

If you want to be more productive, try this...
